## **IMAGING 411 DESIGNATED UNITED STATES DISTRIBUTOR FOR HITACHI COMPUTER PERIPHERALS SCANNER LINE**

April 20, 2010 - Syosset, New York – Document Imaging Value Added Reseller and national equipment maintenance provider Imaging 411, a leading provider of document capture and ECM solutions, today announced it has been designated by Hitachi, Ltd. (TSE6501/NYSE:HIT) and Hitachi Computer Peripherals Co., Ltd., a wholly owned subsidiary of Hitachi, Ltd. as the United States distributor of the Hitachi HT-4139 high speed document scanner.

The Hitachi HT-4139 (MSRP: \$34,995) is a 150 ppm desktop scanner that offers some unique capabilities into the market segment such as a second output hopper, and Tri-stream output. The second output tray is used for exception handling and for sorting out separator sheets from a batch of scanned images. Imaging 411 believes the HT-4139 is the first desktop scanner to offer this capability and at less than a third of the cost of floor standing scanners within the industry that offer multiple output pockets.

The HT-4139 is expected to be one of the first production desktop scanners to take advantage of USB 3.0's higher speed of 5Gbit/sec compared to the older USB 2.0's 480Mbit/sec. The additional speed is utilized by the scanner's ability to output three different streams of data simultaneously. Users can select from numerous output options, such as 24 bit color, 8 bit grayscale, and bi-tonal images, or outputting a color image, a color dropout image and bi-tonal at speeds up to 150ppm.

"Imaging 411 is honored to introduce the HT-4139 scanner into the United States with Hitachi. We believe this scanner represents a revolutionary change in the high speed desktop category and will be very successful here." commented Joe Paradiso, CEO of Imaging 411.

"We are very excited to introduce the Hitachi production scanner HT-4139 into the US market, partnering with Imaging 411. We are fully committed to helping customers to reduce OPEX costs significantly through increased performance and unique features such as dual output trays, and being successful in this market," said Jun Nishiyama, Board Director of Hitachi Computer Peripherals Co., Ltd.

### **About Imaging 411, Inc**

As one of the world's fastest growing value added resellers of document management solutions and equipment maintenance, Imaging 411 has earned its reputation as an industry leader through its total commitment to customer service and performance.
