

SimpleSoftware

Simple solutions for document management

What customers say about the SimpleIndex:

"I wanted to thank you for your great product. Being a full mortgage banking company, the management of paper has always been a challenge. SimpleIndex has changed forever the way we do business. This product has increased both our profits and the morale of our employees. We are no longer drowning in a sea of paperwork."

- Wendell Couch – CFO of HomeStar Financial

"We needed a powerful capture software product to drive all the different scanners we own. SimpleIndex provided us with all the features and flexibility we required."

- NY Service Bureau -

- Basic:** Value priced version, provides TWAIN support to capture and manually index documents for release.
- OCR/Barcode:** Includes all the features of Basic, but includes OCR or Barcode processing to automate the indexing process.
- Full:** Includes Basic features, OCR, Barcode and supports all ISIS scanners for batch managed scanning.

Don't let the name fool you, "Simple" doesn't mean this product lacks any features or is entry level, it means easy to use. The developers at SimpleSoftware have worked closely with their customers and partners to provide a robust document capture suite of products that competes with products that cost substantially more.

No monthly page count limits, no tiered pricing based on scanner models or click charges. When you purchase SimpleIndex, you can get maximum productivity out of your scanning equipment without worrying about click charges, or page limits. Also, SimpleSoftware doesn't charge you thousands of dollars more, like their competition does, to use their software when you upgrade to a faster, more expensive scanner.

"Imaging 411 seamlessly integrated SimpleIndex into our existing document management solution, allowing us to automate and capture electronic documents in less than a day"

-FDNY

Many inexpensive scanning applications lack time-saving automation features like OCR and barcode recognition. SimpleIndex is the most affordable fully-featured document capture solution available. SimpleIndex provides easy 1-click scanning, unattended processing and even supports MS Office, PDF, audio and video files. It is the fastest, most affordable way to organize all of your digital files or index them for your document management system.
